DETAILED ACTION

Applicants' arguments, filed April 23, 2008, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hennequin et al (WO 01/32651, provided by Applicant).

Claims 14-17 are drawn to a method of treating cancer, comprising administering

ZD6474 and 5-fluorouracil (5-FU), optionally with radiotherapy.

Hennequin et al discloses a method for the treatment of cancers, including colon (colorectal), breast, prostate, lungs and skin, in a warm-blooded animal (p. 1, lines 1-6 and p.28, lines 11-17), which comprises administering a compound of formula I (p. 3). ZD6474 is specifically identified as a compound of Formula I (claim 8). Hennequin et al further teaches combining ZD6474 with additional antineoplastic therapies, including 5-FU and radiotherapy, and that this sort of combination therapy is normal practice in the field of medical oncology (p. 26, lines 22-31 and p. 27, lines 20-30). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to administer ZD6474 with 5-FU and radiation for the treatment of a solid tumor, thus resulting in the practice of the instantly claimed invention with a reasonable expectation of success.

Applicant argues that there is no motivation to combine ZD6474 with 5-FU and radiotherapy. This is not found persuasive because ZD6474 is explicitly disclosed as a preferred compound. In fact it is the only compound in claim 8. Additionally, as noted above, 5-FU and ionizing radiation are explicitly disclosed as suitable for administration with ZD6474 and combination therapy is taught to routine in the art, providing the motivation to one of ordinary skill in the art to practice the instantly claimed method. Applicant argues that the combination of ZD6474 with 5-FU produces surprisingly beneficial results. This is not found persuasive because the data on pages 36 and 37 of the instant specification demonstrates merely additive results.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
